
Math Lab #1:
Midterm and Final Exam Visualization

Sunglok Choi, Assistant Professor, Ph.D.
Computer Science and Engineering Department, SeoulTech
sunglok@seoultech.ac.kr | https://mint-lab.github.io/

Overview

- **Prerequisite**
  - Anacodna (Individual Edition)

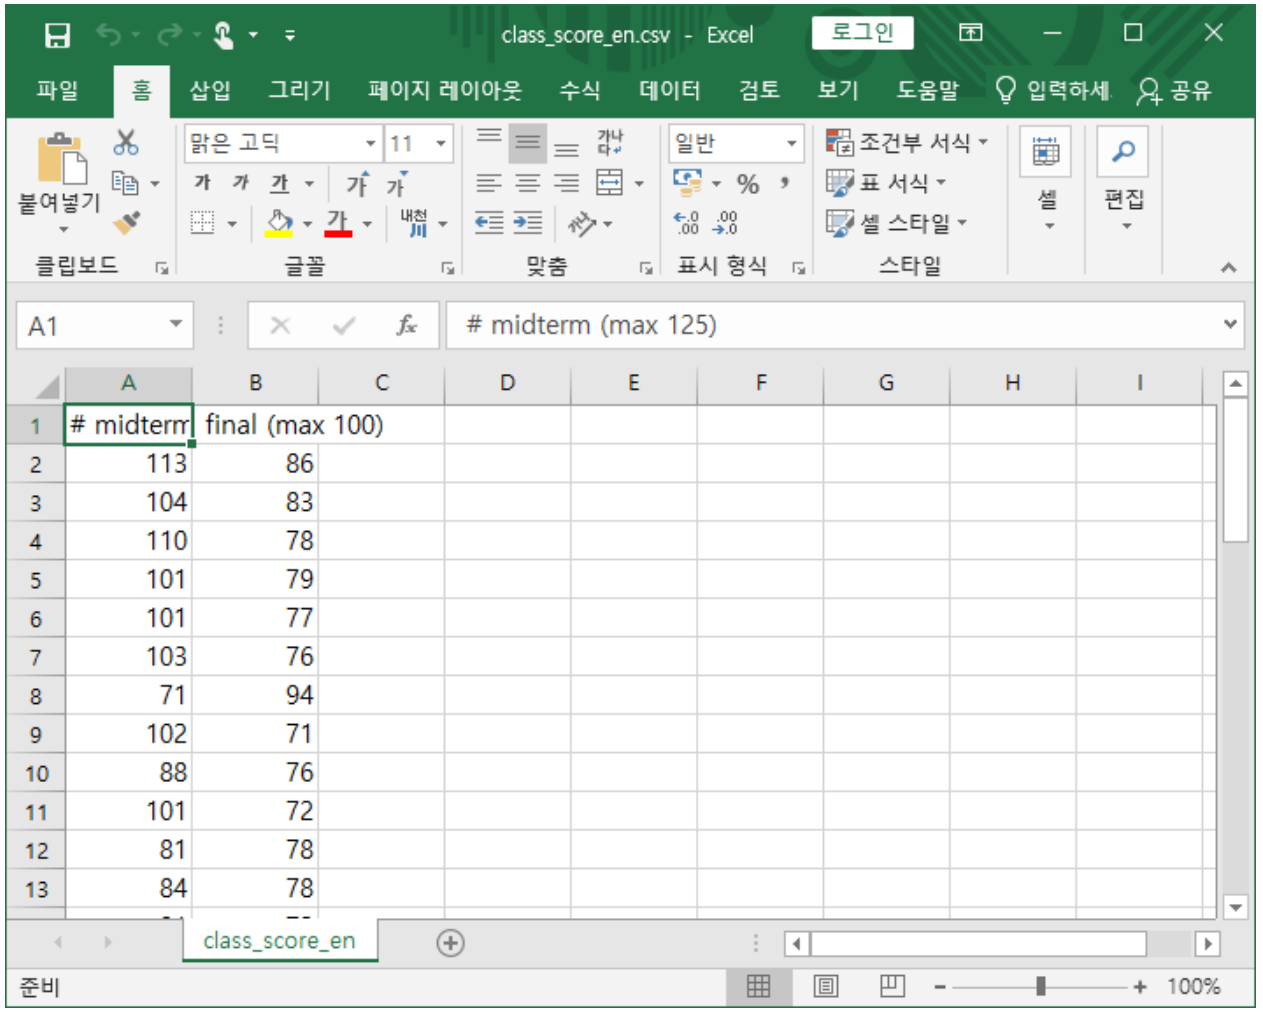
- **Practice: Midterm and Final Exam Visualization**
  - The given data
  - Expected results
  - Practice with the skeleton code
    - Step #1) Derive midterm, final, and total scores
    - Step #2) Plot midterm/final scores as points
    - Step #3) Plot total scores as a histogram

- **Assignment**
  - Mission: Complete the given skeleton code

Practice: Midterm and Final Exam Visualization

- The given data (file: `data/class_score_en.csv`)

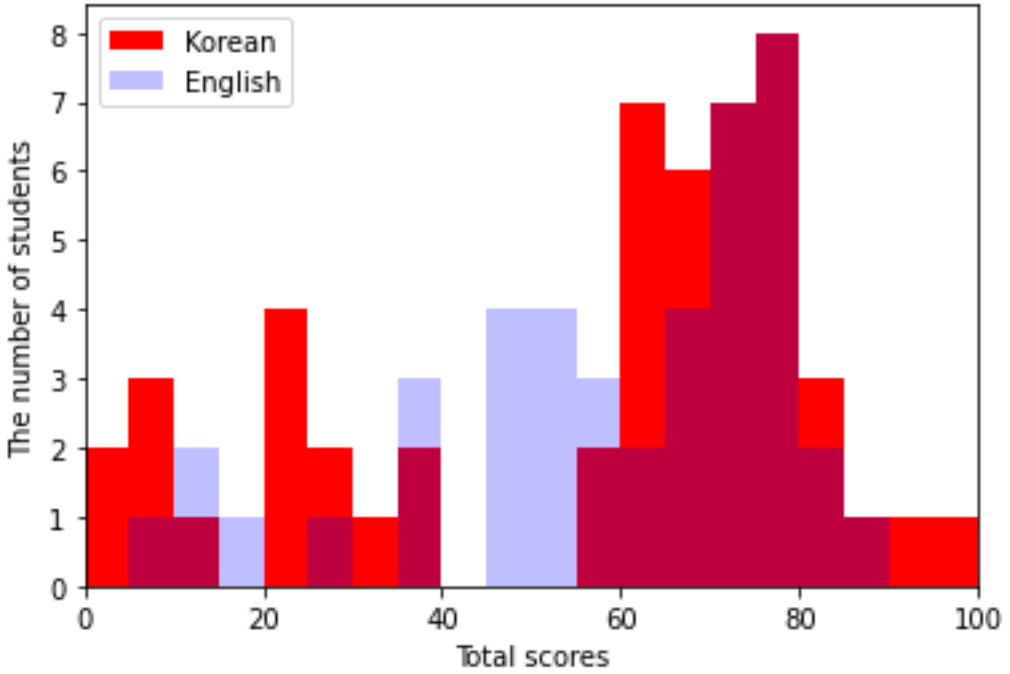
```
# midterm (max 125), final (max 100)
113, 86
104, 83
110, 78
101, 79
101, 77
103, 76
71, 94
102, 71
88, 76
101, 72
81, 78
84, 78
. . .
```



Practice: Midterm and Final Exam Visualization

- Expected results
  - Scatter plot
    - Data: Midterm scores (X) and final scores (Y)
    - The range of X: [0, 125]
    - The range of Y: [0, 100]

  - Histogram
    - Data: Total scores
    - The range of histogram: [0, 100]
    - The width of bins: 5



Practice: Midterm and Final Exam Visualization

- The given skeleton code (`class_score_plot_skeleton.py`)
  - Step #1) Derive midterm, final, and total scores
  - Step #2) Plot midterm/final scores as points
  - Step #3) Plot total scores as a histogram

```
import glob, csv
import matplotlib.pyplot as plt

def read_data(filename):
    ...
if __name__ == '__main__':
    # Load score data
    class_kr = read_data('data/class_score_kr.csv')
    class_en = read_data('data/class_score_en.csv')

    # Derive miterm, final, and total scores
    midtm_kr = [0]
    final_kr = [0]
    total_kr = [0]
    midtm_en = [0]
    final_en = [0]
    total_en = [0]

    # Plot midterm/final scores as points

    # Plot total scores as a histogram
```

Assignment

- Mission
  - Complete the given skeleton code (`class_score_plot_skeleton.py`)
  - Submit your code (`class_score_plot.py`) and its two figures (`class_score_scatter.png`, `class_score_hist.png`)

- Condition
  - Please follow the above filename convention.
  - You can start from scratch (without using the given skeleton code).
    - However, you should use the same data shown in the slide 5.
  - You can freely change the given skeleton code if necessary.

- Submission
  - Deadline: **October 20, 2021 23:59** (firm deadline; no extension)
  - Where: e-Class > Assignments
  - Score: Max 10 points
